

Live Area

Artwork guidelines for Pronto 33.25" wide retractable bannerstand.

Extend artwork to edges of this template, but note visual and live areas.

Preferred file type is Adobe Illustrator with placed (not embedded) images supplied in a support folder. All placed images should be 100-150 dpi at output size. All fonts changed to outlines. All pantone colors specified.

Place art on Artwork layer....Add more layers if you need to.

Please DO NOT REMOVE template layer.

Upload to my Hightail account with the artwork link at www.tradeshowstuff.com

Hi Resolution PDF file made from Illustrator is acceptable if all fonts are outlined and images embedded.

Other files that will work:
A Photoshop file (PSD) with fonts rasterized,
Hi Resolution Tif, or Jpg.
